UPVC DOOR & WINDOW SYSTEMS

Tulip has been launched with a vision of providing superior quality door and window systems for residential and commercial units.

Our endeavor is to ensure customer's satisfaction by doing our job well and providing personalized after sales service. We put utmost stress in ensuring that our products not only conform to the international standards of innovation & durability but also do justice to family & community health and environmental standards.

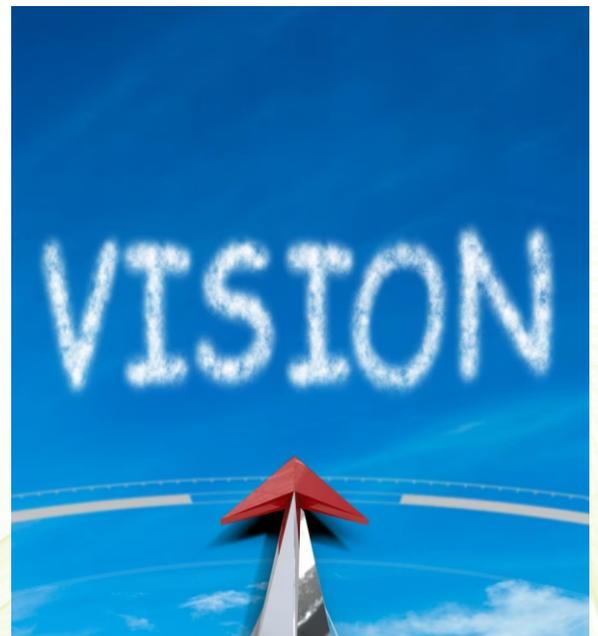

## Mission

In line with the Vision above, our Team of well qualified and trained personnel endeavors to make the Company a Market Leader so that we become the preferred supplier of u-PVC Profiles for Doors and Windows that inspire creativity and innovation with unmatched Product and Customer Service, while leaving a positive impact on our environment and contributing towards the Nation and the World's transition to sustainable energy.

## Vision

To put the thoughts of our Visionaries in words we aim to set World Class Standards in the Indian Windows and Doors Industry by providing a diverse range of High Quality and reasonably priced Value-for-Money Environment Friendly, Non-Toxic Profiles prepared in accordance with the Tropical Indian Climatic conditions, striving to satisfy ever changing customer requirements of profiles for Green Energy Saving and WeatherProof Doors and Windows.

## Future Ready

Mankind has come a long way from the prehistoric time to modern times; from the Neanderthal Cave Dwellers to Modern Day Luxury and Green Buildings; from Cave Entrances to small windows high up in impregnable Roman walls to Ornate Windows and balconies in Gothic Buildings to Tall Rectangular Renaissance Windows to Modern day secure, aesthetic and energy efficient windows the expectations from Doors and Windows are scaling new heights- so whats next? The answer is Doors and Windows from Tulip Windows System u-PVC Profiles.

## A combination of Aesthetics And Robustness

Tulip u-PVC Profiles combine Beauty with the Beast. Our robust and sharp edged geometric design mellowed by ovular and curved exteriors lend a combined aura of robust strength and aesthetic elegance that will satisfy any taste in Style and Design.

## Care for the Individual & Planet

We care for your health and also for the health of your loved ones, especially the infants. Our profiles are Lead Free and, thus, totally Non-Toxic and absolutely harmless to your children. Added to that, these are 100% Recyclable, since, we care not only for You, but for the entire Planet and Humanity. Studies have shown that around 37% energy is lost through Doors and Windows. Tulip u-PVC Profiles maintain Interior Air Quality, thus save on Energy Costs and also provide a Bug Free interior for healthy living.

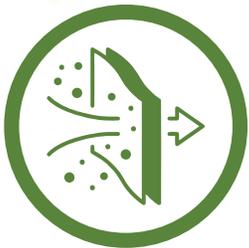

### **Long Lasting & Durable**

Doors and Windows made from Tulip uPVC Profiles are going to last for a long time and will be practically maintenance free making them an excellent investment option for your Home.

### **Weather & Water Resistant**

Unlike other Building Materials, Tulip uPVC Profiles retain their properties even after a long service life and do not alter under extreme weather conditions. The reason is the use of Tropical Mix in the formulation, suitable for the Tropical Climate of India.

### **Wind and Dust Resistant**

Our Profiles, which use Tropical Mix in the formulation, are perfect for Buildings near the Sea or in Arid and Dry Climates. They are perpetually exposed to Scorching Sun Light, Corrosive Salty Air, Strong Winds carrying Grit, and Heavy Rainfall, but remain structurally intact and keep Windows Wind and Dust Proof.

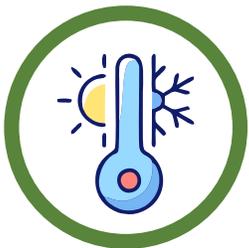

### **Fire Retardant**

Unlike Timber Windows, Tulip UPVC Profiles, as tests on uPVC have shown, are naturally flame retardant through- out their life. They will not cause, support, or enhance the development of accidental fire making them an effective means of fire protection.

### **Sound Diminishing**

Tilip multi-chambered Profile design diminishes the decibels of Sound penetrating through the window. This combined with the right selection of Glazing Thickness and Characteristics diminishes noise levels from uncom fortable and irritating to tolerably pleasant.

### **Thermal Insulation & Energy Saving**

No matter what climatic extremes exist in the area where Doors and Windows with Tulip Profiles have been installed, they provide a Cool or Cosy internal ambient making your Home a comfort- able place and also saving on HVAC and Heating costs.

### **Termite Resistant**

In tropical countries like India, Termites are a common problem that degrades buildings' internal structure over time. Tulip uPVC profiles are highly resistant to Termites, preventing significant damage.

### **Maintenance Free**

All it takes is a wet wiper cloth to clean the external dust and grime off the profiles to bring out a new and original look to the windows and doors from Tulip u-PVC Profiles, making the installation virtually maintenance-free.

### **Structurally Strong & Secure**

Tulip Profiles' tropical mix formulation meets world-class standards for strength, durability, heat stability, color retention, and weather and termite resistance, providing an extra margin of safety. They are suitable for use in high-rise buildings.

### **UV Resistant**

The Tulip u-PVC Profiles are made from a Tropical Mix especially suited for the Indian Climate and Ultra Violet radiation-rich Sunlight. This ability protects the colour for a long time and there is no fading even on surfaces directly exposed to the Sun.

### **Euro Groove Profiles and Inter changeable gaskets**

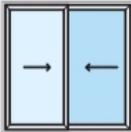

Tulip Profiles come with Euro Groove, simplifying local hardware sourcing and reducing inventory carrying costs. The clever design of the Glazing Beads allows for use with a range of glass thicknesses in Casement and Sliding Windows, further reducing inventory variety and increasing cost-effectiveness.

- Prompt On and Off-Site
- To reduce Wastage and practically eliminate Off-cuts No Off-Cuts
- Window Design Software with Training
- Elegant Colours
- Customised Cut Lengths minimum 2mtr.
- Prompt On and Off-Site Technical Support
